Enamel

It is general purpose smooth and washable, alkyd based synthetic enamel. It has excellent leveling and opacity to provide a smooth flat finish to surfaces. It can be used for steel surface applications in moderate atmospheric environments. It is highly washable and has excellent adhesion on properly cleaned steel surfaces.

Epoxy

A two pack, polyamide cured finishing coat in epoxy system with excellent resistance to mild acids, alkalis, oils and chemicals. It has also very good impact and abrasion resistance. It provides very good corrosion resistance and resistance to splash and spillage of mild chemicals and solvents.

N.C.

A product based on specific nitrocellulose resin. It can be easily applied on wood to give various transparent colours to wood.

Polyurethane

Two packs, colour retentive glossy polyurethane topcoat, with excellent water resistance, salt and corrosion resistance. The dry film is having excellent adhesion to various surfaces, flexibility and impact resistances. The product is recommended for interior and exterior applications, even in marine conditions, with excellent UV resistance.
