We have produced product colours as accurately as printing will allow. Unfortunately we cannot guarantee an exact colour match, and the colours contained in this guide should not be relied on as such. The appearance of the actual colour can be affected by the substrate and the texture of the surface.

Sadolin Exterior Woodcare Protection

AkzoNobel

Wood is the most useful, versatile, beautiful and renewable material available to mankind. For thousands of years, people have used wood for a wide variety of purposes: for example, building, transport (boats, carts and aeroplanes), musical instruments, tools, weapons, fuel, furniture, medicine, paper and a source of chemical feedstocks. When we consider how valuable this resource is, we should do all we can to protect our forest resources and care for the wood that comes from them to maximise its useful life.

Wood is one of the few renewable building materials we have. With good forestry practice and stewardship, supply of wood can keep up with the demand for its use. A tree can be grown again! AkzoNobel supports the work of the Forestry Stewardship Council (FSC) in promoting good and sustainable forestry practice.

FSC GLOBAL PARTNER Working together for people and forests

Planet Possible™

Wood possesses significant aesthetic properties. Properties such as texture, grain orientation, colour, and features such as knots, result in each piece of wood having a unique appearance.

Whether you've invested a lot or paid relatively little for your furniture, it needs to be regularly protected in order to make it last and keep it looking it's best. Before choosing a product, it's important to understand whether your furniture is hardwood or softwood, as both have different needs. If your wood is weathered, a bit of time invested in restoring the wood before you treat it will ensure you get the best result.

So, before choosing a woodcare product, here are three key things to consider to ensure you select the right one:

CHOOSING A PRODUCT FOR WOODCARE

Is your furniture hardwood or softwood?

If it is old and weathered, do you want to restore it first?

Do you want a natural-looking oil or a more opaque finish?

HARDWOOD FURNITURE

Hardwood Furniture is most commonly made from hardwood type such as teak, meranti or iroko, characterised by the dense nature of their wood which gives it some natural weather resistance. However, it still needs regular care and treatment in order to maintain water repellency and prevent the wood losing its colour.

SOFTWOOD FURNITURE

Softwood Furniture is usually made from pine. Ulnlike hardwoods, softwood has a poor natural weather resistance, so it is vital that softwood is throughly protected against decay and moisture damage.

SADOLIN WOODCARE RANGE

AkzoNobel is proud to have some of the world's finest woodcare brands, rich with heritage and brand equity with over 500 years of specialist woodcare expertise.

The Sadolin brand was established over 100 years ago in Denmark. Today, we are the world's largest manufacturer of woodcare products, and our brands collectively protect more wood than anyone else. Our knowledge and understanding of wood is unrivalled and all our brands are supported by world-class research and innovation.

Sadolin Classic Exterior wood protection offers ready-mixed formulations of its most popular colours. Light Oak, Teak, Rich Mahogany and Rosewood semi-transparent finishes are now available off-the-shelf.

Sadolin Classic Exterior wood protection range is suitable for large areas of timber and cladding; protecting and decorating smooth planed wood or rough sawn timber - hardwoods or softwoods. The flexible woodstain is deep-penetrating, providing a low build matt finish resistant to cracking, flaking and peeling.

Sadolin Exterior wood protection Yacht Varnish is a clear protective coating to retain the existing colour of your wood. It can be used in conjunction with Sadolin Classic Woodstain. It offers superior resistance to peeling, blistering and flaking.

Manufactured in AkzoNobel Oman SAOC, Sadolin Woodcare range is supplied directly from the factory to consumer paint stores across markets in the Middle East.
